Nest Investments (Holdings) Ltd

The company based in Cyprus has vacancies for:

Group Operational Risk Manager

Responsibilities

- Co-ordinate all areas of Operational Risk across the Group with strong emphasis on educating, designing, developing and implementing processes to continually strengthen and improve the Operational Risk Management methodology
- Conduct a comprehensive risk assessment review of the business current readiness for “business continuity” and propose a plan of action for mitigation and recovery
- Develop and implement Enterprise Risk Management framework for the organisation.
- Coordinate the execution of risk assessments, scenario analysis, key risk indicators and provide support to the local risk managers

Skills and qualifications

- Professional Risk Management Qualification
- Six or more years of experience in compliance and operational risk
- Two or more years of managerial experience
- In depth knowledge of operational risk issues
- Self-motivated with a structured and determined approach to work
- Ability to articulate complex concepts in a clear manner
- Willingness to travel extensively

Senior Actuary

Responsibilities

- Support the Group Chief Actuary and Risk Manager in a number of technical areas including reserving, capital modelling, pricing, reinsurance modelling
- Carrying out quantitative analysis on thematic data collection exercises and contributing to thematic reports on the analysis, highlighting key issues and emerging risks
- Supporting qualified actuaries and technical experts within the department

Skills and qualifications

- A part-qualified/nearly-qualified actuary
- Five or more years’ relevant actuarial experience, in General Insurance Reserving and capital modelling
- Proven in depth knowledge of actuarial and financial risk issues
- Very good verbal and written communication skills
- Willingness to travel extensively

Actuarial Analyst

Responsibilities

- Analyse and maintain the input and output of financial / economic models
- Utilize actuarial modelling software driven models for pricing, valuation, and/or risk management
- Enter data and tables, run models, and generate reports making adjustments and improvements to models, when appropriate
- Perform research, experience studies and compile, evaluate/certify statistical data.

Skills and qualifications

- An actuarial science, financial mathematics or related degree.
- Progression in the actuarial exams (with the US or UK professional examination system) will be considered as an additional advantage
- Willingness to travel extensively

The Group is offering a professional development scheme covering the cost of professional actuarial exams, providing study time and rewarding exam passes with compensation increases. All candidates must be self-motivated with a structured and determined approach to work, must have very good verbal and written communication skills and the ability to work with multi-cultural teams and in multi-cultural environments. Furthermore, it is expected that the ideal candidates will have an excellent knowledge of Microsoft Office products and a strong information technology understanding.

All interested candidates should send their CV and Cover Letter at: humanresources@nestco.org, no later than 24 June 2016
